! All-in cash out allows you to instantly get value for your hand in cash game all-in situations.
 The way it works: whenever you are all-in before the river you will be offered to cash out your hand.
 The cash out amount you will receive is calculated based on your hand's probability to win the pot after all community cards are dealt.
 Cashing out means you receive instant money risk-free but are no longer eligible to win the pot.

Cash Out Options

- Enabled**
You will be asked in all-in situations if you want to cash out your hand or play normally.
- Disabled**
You will not be offered cash out in all-in situations and will always play your hand normally.

These settings control window and game features when you play at multiple tables and tournaments.

GENERAL

- Popup table whenever user action is required
 - Don't steal focus
- Highlight bet amount
- Single click table activation

TOURNAMENTS / SIT & GO

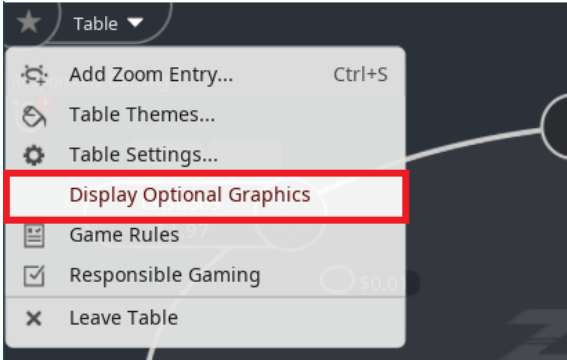

- New tournaments take focus
- Auto-close tournament without notification
- Auto-open tournament lobby
- Allow registration(s) without showing Buy-In dialog
- Mark me as [I'm Ready] at start of Sit & Go tournaments
- Always Start n-Stack Tournaments with Maximum Chips

TABLE THEME CUSTOMIZATION

- Right-Click table to customize theme & background
 - Apply changes to this table only

Disable optional graphics

The table size should be the default. Do not resize the table! If resized - close and reopen!
 In order for the table size to be the default, the option to remember the table position must be disabled:

TABLE WINDOW POSITIONS

! Note: You must have at least 2 tables open for these controls to work.

- Tile Tables (Ctrl-9)
- Cascade Tables (Ctrl-0)
- Stack Tables (Ctrl-8)

- Apply to Active Monitor Only
- Remember Table Positioning

After you have configured the location of the tables on your monitor (without changing their sizes!) and the bot can connect to these tables and play, the option to remember table positioning can be enabled:

If the bot cannot connect to the table or cannot recognize any data from the poker table (or does not recognize them correctly), you must disable the option to remember table positioning, close the table and reopen it.

Be sure to use the stealth settings!
